Blumat Longs (Maxis) Installation Instructions

The smart watering system – Take the guesswork out of watering your plants!

Use Blumat Longs (Maxi Carrots) when your pot size is at least 12" tall. They're also great for perennials, bushes and small trees. The included Blumat installation guide and catalog should answer most of your installation questions. You can also watch our YouTube video at http://www.youtube.com/watch?v= B0ifuOzshJc Any questions, call our tech support

Any questions, call our tech support line 303-998-1323.

Instructions

 Start by connecting the 8 mm hose to a

water reservoir or a pressure regulator

- 2. Unscrew the output adapter and slide it onto the 8 mm tubing.
- 3. Push the tubing onto the nipple and screw the output adapter back onto the pressure regulator or tank connector.
- 4. Run the 8 mm tubing to your plants
- 5. Cut with scissors and use the fittings to lay the tubing around your planting space
- 6. Water thoroughly
- 7. Fill the Blumat Carrots with water, screw tops back on, and soak for at least an hour underwater.

- 8. Water the garden again, push the Blumat Carrot in where you would like the moisture sensed. Cut the 8 mm tubing and insert the Tee attached to the Blumat Carrot.
- 9. For the last Carrot, use the elbow insert instead of the tee.
- 10. Turn on the water and adjust the flow on the carrots per instructions in enclosed booklet

Adjusting the Longs is a little different from the standard Blumat sensors - you don't usually need to turn the valve down as much.

Other suggestions:

- a) Wait 4-5 hours after "planting the Longs" before adjusting - best is to insert the Long in the evening and adjust early the next morning
- b) Turn adjusting screw until drops of water hang but don't drip and no more (unlike the standard Blumats)

You can also plant these horizontally like in these pictures. Installed this way, you can use about half as many as normally recommended.
